### 1. Cancellation policy

Egg sharers must ideally have 10 to 14 good sized (> 14 mm) follicles visible on ultrasound scan after ovarian stimulation. If fewer than 10 good sized follicles are seen on the ultrasound scan, you will be offered the following options:

- Continue with the egg sharing treatment, donate the first five eggs that are collected to the recipient and keep any remaining eggs for yourself;
- Donate all the eggs in this cycle to the recipient and have a subsequent free egg freezing cycle for you;
- Opt out of the egg sharing treatment, continue the treatment and keep all the eggs collected. You will be charged for egg freezing treatment and medications at current prices.
- Abandon the cycle with no further cost or commitment.

If the ultrasound scan after ovarian stimulation shows 10 or more good sized follicles, and the level of oestrogen is satisfactory, you will proceed to egg collection as part of the egg sharing arrangement:

- If 10 or more eggs are collected, the eggs will be equally divided between the recipient and you. If there are an odd number of eggs, the extra egg will be given to you.
- If less than 10 eggs are collected, you will receive the first five eggs and the recipient may or may not receive the remaining eggs (depending on the total number of eggs collected).

2. FET cycles abandoned prior to embryo transfer will be billed for monitoring scans and blood tests plus a £300 cycle admin fee; at embryo transfer, if there are no embryos for transfer we regret no refund can be issued.

3. Payment terms: treatment charges are due by treatment 1st scan. All other charges are payable upon presentation.

This price list is effective from 1 July 2023, serves for information purpose only and should not be treated as a formal service agreement. The above figures are intended as a guide and are subject to change without notice.
