Follow up consultation	£150
Endometrial scratch and saline hysteroqram	£350
Elective sedation	£400
Cryogenic storage of embryos per annum	£360

* reduced fees for egg sharer donors

Please note that you will need to purchase donor sperm for this treatment. We advise all patients to purchase at least 2 ampoules of donor sperm for each cycle of treatment. HSFC offers a selection of donor sperm from our own catalogue and our charge for 2 ampoules is £900.

Please note that any donor sperm samples imported to the clinic will incur an administrative fee for the import process.

Requirements for donor sperm to be used for treatment:

- All samples must be UK compliant (also referred to as ID disclosure)
- All samples must be graded suitable for IVF or IUI, i.e. not ICSI, generally these are called ICI grade
- Samples should be unwashed

We have an established relationship with the following donor sperm banks:

- Xytex (USA) – <http://www.xytext.com>
- European sperm bank (Denmark)
<http://www.europeanspermbank.com>
- Semovo (UK) – <https://www.buysperm.co.uk>

Should you wish to procure donor sperm from a different source, please speak to an embryologist to confirm that we will be willing to accept sperm samples from that supplier.

Reciprocal IVF - Egg Sharer

Terms and notes

1. Cancellation policy

Egg sharers must ideally have 10 to 14 good sized (> 14 mm) follicles visible on ultrasound scan after ovarian stimulation. If fewer than 10 good sized follicles are seen on the ultrasound scan, you will be offered the following options:

- Continue with the egg sharing treatment, donate the first five eggs that are collected to the recipient and keep any remaining eggs for yourself;
- Donate all the eggs in this cycle to the recipient and have a subsequent free IVF cycle for you;
- Opt out of the egg sharing treatment, continue the treatment and keep all the eggs collected. You will be charged for IVF treatment and medications at current prices.
- Abandon the cycle with no further cost or commitment.

If the ultrasound scan after ovarian stimulation shows 10 or more good sized follicles, and the level of oestrogen is satisfactory, you will proceed to egg collection as part of the egg sharing arrangement:

- If 10 or more eggs are collected, the eggs will be equally divided between the recipient and you. If there are an odd number of eggs, the extra egg will be given to you.
- If less than 10 eggs are collected, you will receive the first five eggs and the recipient may or may not receive the remaining eggs (depending on the total number of eggs collected).

2. Abandoned cycles: FET cycles abandoned prior to embryo transfer will be billed for monitoring scans and blood tests plus a £300 cycle admin fee; at embryo transfer, if there are no embryos for transfer we regret no refund can be issued.

3. If your cycle requires replanning, there will be a £100 charge.

4. If you are late to chargeable a monitoring scan appointment by 15 minutes or more, you will need to rebook the appointment and pay the scan fee of £200.

5. Payment terms: treatment charges are due by 1st scan and all other charges are payable upon presentation.

This price list is effective from 1 July 2023, serves for information purpose only and should not be treated as a formal service agreement. The above figures are intended as a guide and are subject to change without notice.
