Terms & Notes

Please note that you will need to purchase donor sperm for this treatment. We advise all patients to purchase at least 2 ampoules of donor sperm for each cycle of treatment. HSFC offers a selection of donor sperm from our own catalogue and our charge for 2 ampoules is £900.

Please note that any donor sperm samples imported to the clinic will incur an administrative fee for the import process. Requirements for donor sperm to be used for treatment:

- All samples must be UK compliant (also referred to as ID disclosure)
- All samples must be graded suitable for IVF or IUI, i.e. not ICSI, generally these are called ICI grade
- Samples should be unwashed

We have an established relationship with the following donor sperm banks:

- Xytex (USA) – <http://www.xytex.com>
- European sperm bank (Denmark) – <http://www.europeanspermbank.com>
- Semovo (UK) – <https://www.buysperm.co.uk>

Should you wish to procure donor sperm from a different source, please speak to an embryologist to confirm that we will be willing to accept sperm samples from that supplier.
